NB. It should be noted that many given **male**-names (e.g., Mohammed) and even a (very) few given female-names are also used as surnames (e.g., Khalid Sheikh Mohammed). Such names are indicated with asterisks.

Pronunciation for diacritical marks:

- | | | |
|------|---|--|
| č | - | as 'ch' (as in <u>ch</u> urch), |
| ć | - | a lighter form of 'ch' (as in <u>C</u> hicago) |
| š, š | - | as in <u>sh</u> ore, |
| ѣ | - | 'f' as in <u>F</u> ather (indicates where 'v' is printed but oral convention in Russian dictates an 'f') |
| zh | - | as in 'plea <u>z</u> ure' |
